BOSCH
Invented for life

▶ Award winning design

▶ Configurable as a single participant, dual-use, or chairperson's device

▶ Functionality can be conveniently expanded with software modules

DICENTIS incorporates several standardized technologies that have been combined to create an open platform. Complete system solutions can be created by simply integrating compatible products. This makes DICENTIS extremely scalable, enabling it to evolve with the growing needs of meeting and conference facilities. At its heart, the DICENTIS Conference System makes use of the unique IP based OMNEO media networking architecture, developed by Bosch.

The elegantly designed DICENTIS Discussion devices enable participants to speak, register a request to speak, and listen to discussion.

The DICENTIS Discussion device can be easily configured as a single-use or chairperson device via the PC configuration software application. To provide a cost-efficient and flexible solution, a software license can be activated to enable dual-use.
