Home Theater Wall Plate

This home theater wall plate is Designed primarily for High Definition Multimedia Interface(HDMI) connection Heavy-Duty 24k Gold plated Connectors are designed to resist corrosion and to provide the best possible connection.

Note: The wall plate terminals will accomodate only standard HDMI connectors (HDMI Type A)

Installation:

You can mount this speaker wall plate using a standard single electrical box.

1. Route the cable through the opening in the back of the electrical box
2. Rear connector is attached to a short extension cable to prevent wallplate and HDMI cable damage

3. Remove the Face plate from the wall plate by pushing down on HDMI connector with your thumbs and at the same time pulling two opposite corners away. Under the face plate you will find two screws hidden there. Place the wall plate against the opening of the electrical box, then thread the two supplied screws through the screw holes in the wall plate and the electrical box, then tighten the screws and reattach the face plate.
