Review.**

"...IT'S UNCONDITIONALLY THE BEST LISTENING EXPERIENCE
I'VE EVER HAD IN A HOME THEATER."

-Darryl Wilkinson

**SOUND
& VISION**

Sharp, precised, targeted audio that sounds amazing in any room - dARTS

After years of research and development, dARTS Theater has created an unparalleled, custom calibration system that takes the room acoustics out of the equation, and **ensures amazing sound in virtually any space**. Combine this technology with a multitude of installation options to create a customized home theater experience that will fit with your decor and outperform any home theater system on the market. Period.

Each driver and every system is custom-calibrated in our anechoic chamber to our demanding engineering specifications of within ½ dB of our response reference. When finished, it is the **most accurate and precisely matched system you can buy**.

DP4000IA

16 Channel DSP / Amplifier System 250 w RMS / Channel

dARTS Theater partnered with Audyssey in 2005 to write a custom PC calibration package for our speakers that brings it back to our **reference response in every room**.

535 Series

Featuring 5.25" woofers, this series is designed to provide a THX reference level of 105 dB SPL in rooms ranging from 2500 cubic feet to 8000 cubic feet.
