

RDL EZ-VDA3B 1X3 BNC NTSC/PAL Video Distribution Amplifier

The EZ-VDA3B is a composite video distribution amplifier with three outputs. The input and outputs are all 75 Ω on BNC connectors. If the outputs are connected to long coaxial cables (typically 100 to 1000 feet) the front-panel gain and equalization trimmers may be adjusted to restore picture clarity. The wide amplifier bandwidth supports high quality video distribution. The EZ-VDA3B is used in stores, houses of worship, restaurants, clubs, security and commercial sound systems.

Features:

- Composite Input to Three Composite Outputs
- Front-Panel GAIN and EQ Trimmers
- Operation with NTSC or PAL Signals
- 75 Ω Terminated Input
- Input and Outputs on Gold-Plated BNC Jacks
- Wide Bandwidth > 400 MHz
