

KD-Pro2x1 KD-Pro4x1

2/4 Inputs to 1 Output HDMI Switchers
with Audio De-embedding of Analog L/R
Balanced/Unbalanced & Digital Coaxial Audio,
supports Ultra HD/4K & HDCP 2.2

Operating Instructions

Key Digital®, led by digital video pioneer Mike Tsinberg, develops and manufactures high quality, cutting-edge technology solutions for virtually all applications where high-end video and control are important. Key Digital® is at the forefront of the video industry for Home Theater Retailers, Custom Installers, System Integrators, Broadcasters, Manufacturers, and Consumers.

Introduction

Key Digital® KD-Pro2x1/KD-Pro4x1 HDMI switchers are designed and engineered to offer the best in quality, performance, and reliability, while providing a cost-effective HDMI switching solution. The KD-Pro2x1/KD-Pro4x1 HDMI switchers are capable of switching 2/4 independent Inputs/Sources to 1 Output/Zone and feature de-embedding of HDMI audio for external distribution. KD-Pro2x1/KD-Pro4x1 support all SD, HD, VESA and Ultra HD/4K video standards, including UHD/4K, 1080p/60, 1920x1200, 3D, and support of HDCP 2.2 and HDR.

About the KD-Pro2x1/KD-Pro4x1

- › **HDMI Switching:** 2/4 HDMI sources to 1 HDMI output
- › **HDCP Licensing:** Fully licensed and compatible with HDCP 2.2
- › **Resolution Support:** Supports all SD, HD, and VESA (VGA, SVGA, XGA, WXGA, SXGA, UXGA)
- › **Ultra HD/4K Support:** 4096x2160 or 3840x2160 30Hz at 4:4:4 and 60Hz at 4:4:4
- › **HDR (High Dynamic Range):** More life-like images through a greater range of luminance levels
- › **Deep Color Support:** Up to UHD/4K 30Hz 4:4:4/12 bits or 60Hz 4:4:4/8 bit
- › **Audio De-Embedder:** Audio from the selected HDMI input is de-embedded through the Coax digital (PCM) or Analog L/R Balanced/Unbalanced
- › **3D Ready:** Capability to pass 3D stereoscopic signal formats
- › **Full Buffer System™:** Manages TMDS re-clocking / signal re-generation, HDCP authentication to source & display, and EDID Control handshake
- › **EDID:** Internal library with 15 default EDID handshakes for inputs, in addition to native EDID data for Output/Display
- › **TMDS re-clocking:** Support for long HDMI connectivity using Key Digital® HDMI cables
- › **Lossless Compressed Digital Audio:** Dolby® TrueHD, Dolby® Digital Plus, DTS-HD Master Audio™, and Dolby Atmos
- › **Control:** Front panel buttons/LEDs, Trigger In, Serial IR, Optical IR, RS-232 Control, and TCP/IP Control
- › **Control System Support:** Key Digital® App ready. Compass Control® ready. Fully controllable by all IR, RS-232, and TCP/IP supported control systems via open API.

Accessories

- › Power Supply: KD-PS5V2ASC, 5V/2A, 100-240VAC, 50-60Hz, Interchangeable head, screw-type connector
- › Rack Ears
- › Remote Control
- › (2) 6-Pin Terminal Blocks

**Always follow the instructions provided in this Operating Manual.
Please check the Key Digital Website for the most up-to-date Manual.**

Quick Setup Guide

- Step 1:** Find a safe and convenient location to mount or place KD-Pro2x1/KD-Pro4x1 unit
- Step 2:** Begin with the KD-Pro2x1/KD-Pro4x1 unit and all input/output devices turned off with power cables removed
- Step 3:** Connect your HDMI source to the input port of KD-Pro2x1/KD-Pro4x1 unit
- Step 4:** Connect your HDMI displays to the output port of KD-Pro2x1/KD-Pro4x1 unit
- Step 5:** **BEFORE connecting power supply to power outlet**, screw-in the power supply to the KD-Pro2x1/KD-Pro4x1 unit
- Step 6:** **AFTER all connections are made, plug-in power supply to power outlets**
- Step 7:** Power on input/output devices
- Step 8:** Operate the KD-Pro2x1/KD-Pro4x1 switcher via front panel buttons, Trigger In, Serial IR, Optical IR, RS-232, and TCP/IP Control.

Installation and Operation

Before permanently securing the unit for final installation, test for proper operation of the unit and cables in your system. It is recommended that you leave enough ventilation space to provide sufficient airflow and cooling.

Pushbutton Control

The KD-Pro2x1/KD-Pro4x1 unit may be controlled via the push button on the front of the unit. Select the desired input by pressing the "Input Select" button. The front LED indicators (1, 2, 3, 4) correspond to the input that has been selected.

IR Remote Control

The KD-Pro2x1/KD-Pro4x1 may also be operated using the IR Remote provided with the unit (the remote is powered by a CR2025 Battery). The KD-Pro2x1/KD-Pro4x1 switcher features an IR sensor on the front of the unit for reception of signals. Please note that some remote buttons may have no functionality. For example, the unit does not power down, therefore the Power Button has no function.

IR Emitter Control

The IR Sensor on the front panel may also accept signals from a Compass Control® Master Controller or from a 3rd party control system. When using a Master Controller or 3rd party control system, the IR Emitter must be mounted over the IR Sensor on the front of the KD-Pro2x1/KD-Pro4x1 unit. The other end of the cable is connected to the Multi-function I/O port on the Master Controller or the IR Extender/IR Connecting Block of the 3rd party control system.

Auto Sensing Slide Switch

The KD-Pro2x1/KD-Pro4x1 unit may auto sense for a present HDMI signal to switch input. There are two positions for this switch.

Auto Sensing ON

- » Unit is forced to auto sense for a present HDMI signal and will switch to the corresponding input/source that is detected
- » The IR Remote, RS-232, or TCP/IP commands cannot change the state of the Auto Sense mode

Auto Sensing OFF

- » Unit is in normal mode and regular switching functionality will occur
- » The IR Remote, RS-232, or TCP/IP commands may enable or disable the Auto Sense mode

Trigger In, Serial IR, RS-232, and TCP/IP Control

The KD-Pro2x1/KD-Pro4x1 features a 6-Pin Terminal Block for Trigger In, IR, and RS-232 Control. Signals may be received from these connections as well as the Ethernet Jack for TCP/IP Control. Serial commands may be found in the "Communications Protocol" section.

For Trigger In, a push button may be used that would externally trigger the front push button. The external push button would be wired to Pins 1 and 3 on the 6-Pin Terminal Block. Trigger In is Pin 1; Ground is Pin 3. The external push button would short these two pins and would operate the unit as the front push button (Input Select) would.

For Serial IR, connect a mono cable to the Multi-function I/O port on the Master Controller or the IR Extender/IR Connecting Block of the 3rd party control system. The other end would then connect to Pins 2 and 3 on the 6-Pin Terminal Block. IR In is Pin 2; Ground is Pin 3.

For Serial RS-232, connect a stereo cable to the Multi-function I/O port on the Compass Control Master Controller or the RS-232 port of the 3rd party control system. The other end would then connect to Pins 4, 5, 6 on the 6-Pin Terminal Block. Tx Data is Pin 4; Rx Data is Pin 6; Ground is Pin 5.

For TCP/IP control, connect an Ethernet cable from the KD-Pro2x1/KD-Pro4x1 to a network router or connect a crossover cable from the KD-Pro2x1/KD-Pro4x1 directly to a PC.

Connections, Buttons, and LEDs

Rear Panel Connections

All connections to the KD-Pro2x1/KD-Pro4x1 are found on the rear panel of the units. Refer to the illustrations below for port assignments while making connections.

EDID Control:

- » Located on the bottom left side of the unit
- » Please refer to **Settings and Adjustments » EDID Control** for rotary position description

HDMI Inputs:

- » The HDMI Inputs are located on the bottom left side of the back panel

HDMI Output:

- » The HDMI Output is located near the middle of the back panel

Audio Outputs:

- » Located on the right side of the unit
- » Audio from the output HDMI signal is de-embedded into an analog or digital signal

Ethernet Jack, Serial IR, RS-232, and Power Block:

- » Located on the right side of the back panel

Audio Outputs

- › **Analog L/R Balanced/Unbalanced connection:** 6-Pin Terminal Block which provides de-embedded 2ch Balanced Analog Audio Output from selected HDMI input source
 - » The Pin assignment for the audio is as follows:
 - » Left + is Pin 1; Left - is Pin 3; Left Ground is Pin 2.
 - » Right + is Pin 4; Right - is Pin 6; Right Ground is Pin 5.
- › **Digital Audio Output (PCM):** RCA Jack which provides de-embedded Digital Audio Output from selected HDMI input
- › **Analog L/R Audio Output:** 3.5 stereo jack which provides de-embedded Analog Audio Output from selected HDMI input
- › There are no volume or tone control features, only muting control of the external audio outputs via RS232.
- › There are no DSP features. Audio must be configured in the source. For example, in order to achieve 2ch analog audio output, the selected HDMI input source audio format must be 2ch.

Audio Input Signal Format	Audio L/R Output	Digital Audio Output (Coax and Optical)
2ch PCM	Pass-Through	Pass-Through
Multi-Channel PCM	MUTE	MUTE
Dolby DTS	MUTE	Pass-Through
HD Audio	MUTE	MUTE

Front Panel Operation

- › There is 1 **Input Select** button along the front panel
 - » Pressing the output button will select the next HDMI input
 - » A blue LED will indicate which Input has been selected
- › There is 1 **Auto Sense Mode** slide switch
 - » Auto sensing mode is OFF when the switch is resting on the left side
 - » Auto sensing mode is ON when the switch is resting on the right side
 - » Auto sensing mode may be remotely set to ON or OFF via IR, RS-232, and TCP/IP when Auto Sensing Mode slide switch is set to OFF.
- › Front button control can be disabled/enabled via serial control if desired
- › The Optical IR window is located on the right side of the front panel receives IR remote control signals
- › **Notes:**
 - » Front LEDs will scroll during boot up
 - » Solid illumination from Output Active LED during active Hot Plug Detection (voltage) link with connected HDMI output device. Steady blink (one per second) if signal is not present

Settings and Adjustments

The KD-Pro2x1/KD-Pro4x1 unit may be configured using the provided IR Remote. Such settings and adjustments include unit address, Hot Plug Detection, and EDID settings. Factory Reset may be completed by using the push button.

Addressing Mode

Units may be addressed when used in a multi-unit system. The Key Digital IR Remote is required to change the address of the KD-Pro2x1/KD-Pro4x1 unit. Please press the following sequence on the Key Digital IR Remote to change the address.

R3 » R1 » R2 » X » X

- » X = Numeric Keypad Button from the IR Remote (Device Select)
- » Default address is 00 – Single unit mode.
- » All addresses must be two digits long
- » All LED lights will blink once to confirm the address has been set.
- » Once a unit has been addressed, the two digit address must precede all IR command sequences

HPD Control

Hot Plug Detection (HPD) may be forced in order to provide the connected input/source with the necessary voltage to inform the device that an output/display is connected and active. In cases of many layers of connectivity, HPD may be lost leading to no signal at the display. In those cases, forcing the HPD mode on will keep an active signal on at all times. The Key Digital IR Remote is required to change the HPD mode of the KD-Pro2x1/KD-Pro4x1 unit.

- ▶ To set Normal HPD Mode (default), please press the following sequence on the Key Digital IR Remote:
 - » **R1 » R2 » R3 » 0 » 1**
- ▶ To set Forced HPD Mode, please press the following sequence on the Key Digital IR Remote:
 - » **R1 » R2 » R3 » 0 » 0**

Notes:

- » All LED lights will blink once to confirm the HPD mode has been set.

EDID Control

EDID (Extended Display Identification Data) is a data structure provided by a digital display to describe its capabilities to a video source. This data is also known as a “handshake” and typically includes manufacturer, serial number, product type, resolutions supported by the display, display size, pixel mapping data, etc.

Key Digital EDID Control allows the integrator to choose the handshake that will be provided to source devices of the system. The EDID handshake is relayed to the source from the switch, or from the connected display (default setting). This handshake will always be the EDID information that the source device receives.

The KD-Pro2x1/KD-Pro4x1 unit provides a 16 position EDID rotary located on the left side of the back panel. Rotate the rotary to the desired position to change the EDID setting.

Notes:

- » All LED lights will blink once to confirm the EDID mode has been set.

The possible EDID settings can range from ‘00’ to ‘15’. (‘00’ is the default).

0	Copy EDID from HDMI Output (Default)
1	1080i@60, 2Ch PCM Audio
2	1080i@60, Dolby/DTS 5.1 Audio
3	1080i@60, HD Audio
4	1080p@60, 2Ch Audio
5	1080p@60, Dolby/DTS 5.1 Audio
6	1080p@60, HD PCM Audio
7	4Kx2K@30, 2Ch Audio
8	4Kx2K@30, Dolby/DTS 5.1 Audio
9	4Kx2K@30, HD Audio
A	4Kx2K@60, 2Ch PCM Audio
B	4Kx2K@60, Dolby/DTS 5.1 Audio
C	4Kx2K@60, HD PCM Audio
D	1280x720p@60 DVI
E	1920x1080p@60 DVI
F	3840x2160p@60 DVI

Resetting to Factory Default

To reset your unit to factory default, press and hold the Input Select button on the front panel for 10 seconds. All LED lights will blink once to confirm that the unit has been reset.

Communication Protocol

The KD-Pro2x1/KD-Pro4x1 allows control over serial interface for bi-directional communication. Use Pins 4, 5, 6 for RS-232 communication.

In addition to RS-232, the serial interface may also be accessed using a TCP/IP connection (Default IP address is 192.168.0.239 with default port 23).

Connection Protocol:

- » Baud Rate = 57600 bits per second
- » Data Bits = 8
- » Stop Bits = 1
- » Parity = None
- » Flow Control = None
- » Carriage Return: Required
- » Line Feed: Required

Notes:

- » Commands are not case-sensitive.
- » Spaces are shown for clarity; commands should NOT have any spaces.
- » Carriage return and line feed is required at the end of each string.
- » If a new command is received, a prompt should be sent back.

Help Command (H). Returns entire API in readable format:

KD-Pro4x1 > H

Specifications

Technical:

- » Input: HDMI Connector, Type A, 19 Pin Female
- » Output (Each): HDMI Connector, Type A, 19 Pin Female
- » Bandwidth: TMDS bandwidth 18 Gb/s
- » DDC Signal (Data): Input DDC Signal - 5 Volts p-p (TTL)
- » HDMI Video/Audio Signal: Input Video Signal - 1.2 Volts p-p
- » Power Supply: KD-PS5V2ASC, 5V/2A, 100-240VAC, 50-60Hz, Interchangeable head, screw-in connector

General:

- » Regulation: CE, RoHS, WEEE
- » Enclosure: Black Metal
- » Product Dimensions: 8.25" x 4.0" x 1.7"
- » Packaging Dimensions: 10.75" x 8.9" x 2.2"
- » Product Weight: 0.9 lb
- » Shipping Weight: 2 lb

Important Product Warnings:

1. Connect all cables before providing power to the unit.
2. Test for proper operation before securing unit behind walls or in hard to access spaces.
3. If installing the unit into wall or mounting bracket into sheet-rock, provide proper screw support with bolts or sheet-rock anchors.

Safety Instructions:

Please be sure to follow these instructions for safe operation of your unit.

1. Read and follow all instructions.
2. Heed all warnings.
3. Do not use this device near water.
4. Clean only with dry cloth.
5. Install in accordance with the manufacturer's instructions.
6. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
7. Only use attachments/accessories specified by the manufacturer.
8. Refer all servicing to qualified service personnel. Servicing is required when the device has been damaged in any way including:
 - » Damage to the power supply or power plug
 - » Exposure to rain or moisture

Power Supply Use:

You MUST use the Power Supply provided with your unit or you VOID the Key Digital® Warranty and risk damage to your unit and associated equipment.

How to Contact Key Digital®

System Design Group (SDG)

For system design questions please contact us at:

- › Phone: 914-667-9700
- › E-mail: sdg@keydigital.com

Customer Support

For customer support questions please contact us at:

- › Phone: 914-667-9700
- › E-mail: customersupport@keydigital.com

Technical Support

For technical questions about using Key Digital® products, please contact us at:

- › Phone: 914-667-9700
- › E-mail: tech@keydigital.com

Repairs and Warranty Service

Should your product require warranty service or repair, please obtain a Key Digital® Return Material Authorization (RMA) number by contacting us at:

- › Phone: 914-667-9700
- › E-mail: rma@keydigital.com

Feedback

Please email any comments/questions about the manual to:

- › E-mail: customersupport@keydigital.com

LIMITED
10 YEAR
WARRANTY

Warranty Information

All Key Digital® products are built to high manufacturing standards and should provide years of trouble-free operation. They are backed by a Key Digital Limited 10 Year Product Warranty Policy.
