

Digital Projection INSIGHT LASER Insight Projector/12000 Lumens/2000x1/4K

Developed to Deliver Value, Year after Year The INSIGHT 4K LASER introduces a remarkably bright 4K projection solution for discerning professional, residential, simulation, visualization, signage, worship, and large- screen applications. Venues where both image detail and image stability are critical will directly benefit from both the 4K LASER's advanced resolution and solid-state illumination platform. Additionally, applications where image uniformity is a critical concern, such as venues employing the same content across numerous screens simultaneously, will immediately realize value from the 4K LASER's consistent solid- state illumination performance. In environments where the projector will be installed in hard-to-reach locations, the impressive limited maintenance of the INSIGHT 4K LASER display will save both time and maintenance costs. With 20,000 hours of illumination life and no lamp replacements required, the INSIGHT 4K LASER delivers bright, stable and color-accurate imagery. All with the stunning detail and image subtlety that only full 4096 x 2160 4K resolution can deliver, and all at approximately 40% of the size and weight of existing 4K projector solutions. In applications where a compelling, clear visual experience is a critical measure of success, DP'S INSIGHT 4K LASER delivers.

No Lamp Replacements = Low Maintenance & Budget Friendly The elimination of lamp replacements due to the solid-state illumination system creates immediate value for any venue. By bypassing regular lamp replacement cycles, nearly all lifetime costs for the INSIGHT 4K LASER are incurred at time of purchase. This key characteristic allows the INSIGHT 4K LASER to provide, in many cases, a substantially abbreviated cost of ownership over the lifespan of the system. Venues looking to produce a dazzling visual experience will realize true cost-saving benefits through the advanced illumination technology of DP's LASER displays.

Truly Flexible In addition to long-life, consistent illumination, INSIGHT 4K displays offer unprecedented installation flexibility. With the INSIGHT 4K LASER, nearly all tilt configurations, including portrait mode, are within reach. INSIGHT 4K LASER displays can be positioned vertically, horizontally, and almost anywhere in between, without degrading lumen performance or the lifespan of the illumination source.

Note: Lenses, Lamps and Accessories are not included. Please contact us for options.

Features:

- **12,000 ANSIlumens**
- **2,000:1 Contrast Ratio**
- **4K (4096 × 2160) Resolution**
- **Lamp Free**
- **20,000 hours illumination**
- **Portrait and Landscape capable**
- **Unbeatable cost of ownership**
- **Full 4k 3D display capability**
- **Dual Pipe input capability (2 x Display Port 1.2)**
