

Phase Technology CS-8R 8in 2-Way In-Ceiling Speaker w Micro-Flange Grille

8in 2-Way In-Ceiling Speaker w Micro-Flange Grille (Sold as pair)

The CS Series is engineered to handle the dynamic range of multi-channel audio technologies like Dolby Digital and DTS as well as traditional two-channel sources. These in-ceiling speakers deliver high-end tonal balance and a clear distinction between musical notes. The line comprises two-way models including 6.5" and 8" polypropylene cones with NBR™ surrounds for lasting performance, indoors or out, and dual voice coil, dual tweeter configurations permit one CS-Micro series speaker to deliver stereo sound to any room.

Regardless of application, serious audiophile listening or home theater, we recommend that you take the time to read this manual thoroughly before connecting speakers to your amplifier or receiver.
