

Phase Technology CI6.2X 6.5in 2-Way Switchable In-Ceiling Surround Speaker

6.5" 2-Way Switchable (Mono/Stereo & Bipole/Dipole) In-Ceiling Surround Speaker With Micro-Flange Grille

When high-end stereo reproduction is needed from one single speaker, the CI6.2 X is the clear choice. It utilizes a dual voice coil woofer with two tweeters to combine two channels of input to one.

Included jumper switches also allow for use as a bipole or dipole surround speaker in a home theater system. The weather resistant design makes it an excellent choice for bathrooms, hot tubs or outdoors.
