ATHENS TCS122-FP

The TCS122-FP consists of a pair of steel fly plates specifically designed for flying TCS122 cabinets. The matt black powder coated fly plates feature recesses that accept TCS-FK1 inter-cabinet couplers, with all being secured to the cabinet using the four M10 bolts and spring washers supplied with the fly plate kits.

A complete TCS122-FP kit is required for each cabinet that is to be arrayed.
