

Phase Technology DP2071T FS KIT dARTS 660 Series Tower (7.1) Speaker Kit

This listing is for DP2071T FS Speaker Kit (7.1) only. Use description below as a general reference.

The newest addition to the dARTS family, the 660T is a powerful 3-way speaker enclosed in an elegant tower cabinet with a high gloss black finish. The 660T has three 6.5" woofers constructed of a three-layer composite of glass fiber / Nomex honeycomb / glass fiber and a 1.125" soft dome tweeter (both drivers are Phase Technology inventions) in a ported enclosure. These towers function as left and right mains for a dARTS system, with a freestanding center speaker, custom box surrounds and freestanding subwoofers in 12" or 15" woofer sizes. Subwoofers incorporate a polypropylene woofer with NBR surround in a handmade cabinet with high gloss black finish. A system using 660 Tower mains will provide up to 105 dB SPL (THX reference level) in a room measuring up to 18,000 cubic feet. Systems can be ordered in a variety of configurations. Your dARTS integrator will help determine the proper configuration for optimal room coverage in your theater.
