

TV One P2-105 1x5 12VDC Power distribution unit

P2-105 Power Supply is a power distribution unit designed to replace up to 5 of the 12VDC adapters for use with the C2-1000 or S2 series units.

Each of the 5 outputs is protected with a self resetting fuse that will recover once a fault has been removed. To offer further protection the unit also provides over current and short circuit protection..

Mechanical construction uses the same form factor as the companion S2 switcher products and the P2-105 can be rack mounted using the optional RM-220 single/dual rack mount kit.

Key Features of the P2-105:

- 5x 12V 1A power outlets for locking power cable
- 5x Self resetting fuses
- Optional Single/Dual Rackmount Kit
