

Gefen ADA-DVI-2-DVICMP DVI to DVI and Component Adapter

Intended Use(s): Home Theater | Computer A/V | Digital Signage

Extract DVI-D and Component Video The DVI to DVI and Component Adapter allows you to extract either Component video and/or digital DVI-D video from a single video source (typically a computer video card). **How It Works** Simply plug in the DVI-I connector from your video source to the input side of the cable. Plug in the Component and/or DVI-D outputs to display devices (monitors or projectors).

Note: When using a computer graphics card, the DVI port must be capable in outputting a digital and an analog signal SIMULTANEOUSLY to get two active displays.

Package Includes:

- (1) DVI to DVI and Component Adapter
