

PureLink ODA II Tx/Rx DVI +Audio/RS-232 over 2 LC Fiber Extender (Transmitter/Receiver) Kit

Purelink's new ODA II Tx / Rx is a standalone fiber optic signal extension system capable of transmitting DVI/HDMI, 3.5mm Stereo Audio and RS-232 signal over a two strand fiber-optic cable. In addition, the fiber type can be either single mode or multimode. There is a distinctive difference in the distance depending upon the type of fiber cable that is being used. A multimode cable can extend up to 500m at WUXGA/ 1080p@60Hz, but the distance significantly increases when using a single mode fiber which can extend up to 2000m at WUXGA / 1080p@60Hz. By having a flexible fiber solution, PureLink's ODA II provides a convenient and affordable solution for transmitting highest quality video and audio signal in various applications.
