

PureLink ODC Tx/Rx DVI over 8 LC Fiber Dual Link Extender Kit (Transmitter/Receiver) Kit

The Purelink ODC dual-link DVI fiber optic extension system allows to extend highest quality digital video signal and audio signal (optical & coaxial) up to 1,640 ft over fiber optic cabling. No more copper wiring bewtween transmitter and receiver for DDC2B and the transmission of 5v power. To ensure a reliable connection, Purelink EDID management system automatically manages EDID by mainaining continuous EDID communication between connected devices(monitor & video source). Since it uses only fiber, transmission of content is highly secure and immune to outside interference and it is favored in government, military, school and medical environments.
