INTRODUCTION

Atlona Technologies' new Mini DVI, model AT-DVIF20SR, (Sender and Receiver) is a low cost Fiber Optic HDMI extender. These extremely small form factor, UL/CE approved units will carry DVI video signal and HDCP/DDC information through a single multimode fiber allowing any HD source to extend signal up to 400m (1320FT) at WUXGA (1920x120 @ 60Hz) or HDTV resolutions 1080p/1080i/720p. These balun units are equipped with advanced digital fiber optic technology allowing for self adjustment with no compression, bit reduction, or signal degradation. Multiple signals can be run in a single conduit without crosstalk. These units support 12-bit color depth and have an 8dB input equalizer, which compensates losses over 5m (16ft.). ESD Protection on all I/O interfaces has been added to ensure quality assurance. With no power cord needed, quick and easy set up is as simple as plug and play.
