## INTRODUCTION

Atlona Technologies' AT-COMP-42M is one of the most innovative Component Video with Optical/Digital Coax/Analog Audio Matrix switcher on the market. The AT-COMP-42M has 4 individual Component (RCA) /Optical/Digital Coax and Stereo Audio inputs and 2 individual outputs. Because it is a matrix switch, any input can be routed to any output; and the same input can be routed to all outputs or any other combination. This switch is ideal for connecting sources including: (VCRs, Camcorders, Video Game Consoles, DVDs, Satellite Receivers, Set Top Boxes, Apple TV, etc.) to desired displays such as: (HDTV, LCDs, Plasma Monitors, Video Projectors, etc.) Selection of inputs can be achieved manually through the Front Panel, an Infrared Remote Control or RS232 serial control input. AT-COMP-42M is capable of flawless and crystal-clear distribution of all HDTV video formats up to 1080p as well as Digital and Analog audio signals.
