

Gefen GTV-HDMI1.3-142 GefenTV 1:2 Splitter for HDMI 1.3(Discontinued. Replaced by EXT-HDMI1.3-142D)

Split HDMI 1.3 Video to 2 HDMI DisplaysThe GefenTV 1:2 HDMI Splitter for HDMI 1.3 allows set-top boxes, DVD players, DVRs and other HDTV devices with an HDMI 1.3 output to be connected to two HDTV displays. Greater numbers of displays can be connected by chaining multiple splitters together to create a larger distribution.**How It Works**The GefenTV 1:2 HDMI Splitter for HDMI 1.3 is connected using an HDMI cable from the HDMI 1.3 video source to the input of the GefenTV Splitter. There are two HDMI 1.3 outputs. Once all connections are made, power-cycle all equipment and you should see beautiful, sharp HDMI 1.3 video on all of your HDMI displays.

Note:

Display Output 1 is connected to the Primary Display, from which the resolution and device capability information (EDID) is obtained. All other displays on the other outputs must be capable of the same resolution(s) being shown on the Primary Display, or they may not show a picture.
