

Gefen ADA-MDP-2-DPF Gefen Mini-DisplayPort to DisplayPort Adapter ADA-MDP-2-DPF

Connect Mini-DisplayPort-equipped devices to DisplayPort displays with a standard DP connection

Use the Gefen Mini-DisplayPort to DisplayPort Adapter to connect a laptop or workstation using the Mini DisplayPort jack to a display equipped only with a standard DP connector.

How It Works

Connect the smaller end of the Adapter to the computer source. Next, connect the standard DisplayPort connector cable (sold separately) to the larger end of the Adapter. Finally, connect the other end of the standard DisplayPort cable to the display.

Note: The Gefen Mini DisplayPort to DisplayPort Adapter can be used for single or extended output.
