

# Gefen EXT-DVI-FFWP Gefen DVI Female to Female Adapter with 5V DC Power EXT-DVI-FFWP

## DVI Female to Female Adapter with 5V DC Power

The Gefen DVImate is a cable coupler solution that allows two separate DVI M-M cables to be connected together without losing the audio/video signal integrity. Increase the range of a DVI monitor, or place a computer away from a DVI monitor at a comfortable and convenient distance. The DVImate can add power to the DVI cable should it be lacking on pin 14.

### How It Works

Connect DVI cables to each connector on the Gefen DVImate. Doing this creates a longer and more flexible cable to make connections to DVI equipment and/or displays more convenient. Gefen DVImate couples two cables, transmitting the signal pin-to-pin.

### Features:

- Easily connect two DVI cables together
- Adds the facility to power the DVI cable

### Specifications:

- DVI Connector: DVI-I 29 pin female
- Power Supply: 5V DC 1A
- DVI Power: DVI pin 14
- Dimensions: 1.7"W x 1"H x .7"D
- Shipping Weight: 1lb

### Package Includes:

- (1) DVImate with Power
- (1) 5V DC 1A Power Supply
