

Gefen ADA-FW-1394FF FireWire 400 Female to Female Adapter

Connect two FireWire 400 cables together to create a longer run

This adapter will connect two FireWire 400 cables together to create a longer cable.

How It Works

Connect your FireWire 400 extension cable to your computer or other source device. Connect the free end of the extension cable to one end of the FireWire 400 Female to Female Adapter. Connect another FireWire 400 extension cable to the Female output side of the Adapter to complete the coupling process and create a longer cable.

Note: This Adapter is a cable coupler only, not a signal amplifier or repeater. Care must be taken to insure that the total length of the joined cables does not exceed the FireWire 400 signal propagation distance limit of 33 feet. For distances over 33 feet, please use one of the FireWire Repeaters shown at left in the Related Products Section.

Specifications:

- Unit Weight: 1 oz.
- Dimensions: 0.7 W x 0.3 H x 2.1 D (inches)

Package Includes:

- (1) FireWire 400 Female to Female Adapter
