

Hall Research 4-to-1KVM 4 Channel KVM Server Switch

This convenient and reliable device allows one monitor keyboard, and mouse to control 4 different PC's or servers.
The Model 4-to-1 KVM eliminates the need for 4 separate keyboards, mice and monitors.

The 4-to-1 boasts the fastest switching times from one PC to another, is glitch free, and features full PS2 emulation and hot-plug capabilities.

Features:

- Eliminates the need for 4 separate keyboards, mice and monitors.
- No software required
- Clear and sharp video switching (video resolutions to 1600x1200 at 50 to 85 Hz refresh rate)
- Extremely Reliable
- Quick and seamless switching between PC's
- LED indicators of PC power status and PC selected
- Comprehensive PS/2 protocol emulation for keyboard and mouse for all PC's at all times
- Hot-swapping capabilities of the PC's and the devices
- Error detection and recovery protocols
- Returns to last selected PC after power off or reset
- Small and compact design
- Designed and manufactured in the USA
