Hall Research 4-to-1KM 4 Channel Keyboard and Mouse Switch

This convenient and reliable device is used to allow one user to control 4 PC's using only one keyboard and mouse. The Model 4-to-1 KM eliminates the need for 4 separate keyboards and mice. The 4-to-1 boasts the fastest switching times from one PC to another, is glitch free, and features full PS2 emulation and hot-plug capabilities.

Features:

- No software required
- No Power Supply needed
- Quick and seamless switching between PC's
- LED indicators of PC power status and PC selected
- Comprehensive PS/2 protocol emulation for keyboard and mouse for all PC's at all times
- Hot-swapping capabilities of the PC's and the devices
- Error detection and recovery protocols
- Returns to last selected PC after power off or reset
- Small and compact design
- Designed and manufactured in the USA
