

Gefen EXT-RACK-MGPR Modular General Purpose Rack tray

The Best Solution For Mounting Multiple Gefen Products

The Gefen Modular General Purpose Rack Tray is the perfect solution for cleanly mounting multiple Gefen devices in a 1U rack tray. The integrated modular mounts can be adjusted to fit different Gefen enclosures. There are convenient and secure mounting brackets for Gefen power supplies located in the rear of the tray. Cable tie mounting slots are also included in multiple locations to aid in organizing all of the cables. The modular tray conforms to the EIA-310 standard and will fit in a standard 1U rack height space.

How It Works

The Gefen Modular General Purpose Rack Tray has six moveable mounting brackets that will hold up to four products within the provided 16.5 inches of space. Each padded bracket has a mounting screw that can be loosened and moved to accommodate multiple product sizes. Adjust the bracket to fit the device and tighten the mounting bracket screw. Standard Gefen device power supplies can be mounted just behind the products using the pre-sized power supply mounting brackets. Up to four Gefen power supplies can be attached. Once the power supplies and product are secured, connect all accompanying cables. Cable ties can be used to bundle and organize attached cables using the multiple mounting slot locations on the rack tray.

Features:

- Modular mounts fit an assortment of Gefen products
- Ideal for Gefen Extenders
- Integrated mounts for up to four Gefen power supplies
- Cable tie mounting slots for organization

Specifications:

- Maximum Usable Inside Width: 16.5"
