

RS SERIES NETWORK RACK

User's Manual
**RS22U80/RS42U100/RS42U120/
RS47U100/RS47U120**

OVERVIEW:

ATEN Racks are designed for mounting standard 19“ rack - mount equipment – servers, routers, UPS systems, switches, audio/video devices – regardless of brand. All racks provide straightforward equipment organization, excellent security and simple cable management while enabling optimum airflow.

RS SERIES FEATURE:

- 1. Hexagonal perforated front and back doors provide higher tensile strength than round holes while ensuring efficient airflow and optimized ventilation
- 2. Static loading capacity up to 800KG

AVAILABLE RACK DIMENSIONS BELOW:

Model No.	Capacity(U)	Width(mm)	Depth(mm)
RS22U80	22U	600	800
RS42U100	42U	600	1000
RS42U120	42U	600	1200
RS47U100	47U	600	1000
RE47U120	47U	600	1200

CAUTION:

- Before installing this product, please note the following safety information:
- 1. Always lower the leveling feet of the rack cabinet;
 - 2. Always install equipment starting from the bottom of rack cabinet to top;
 - 3. Always install the heaviest equipment in the bottom of the rack cabinet;
 - 4. Always have two or more persons during assembling and moving the rack cabinet;

NOTE: Above products can be shipped in Build-up method or Knock-down/flat-packed method

Step 4:

Install the castors to the four corners at bottom by M6*12 self-tapping screws.
Install the M12*L90 Leveling Legs also to each corner.

Refer the left upward view picture.

Step 5:

Install side panels, adjust the diagonal dimension of cabinets.
Remark: because the cabinets is disassembled design, after assemble, please check and adjust the diagonal dimension, ensure the space between doors are acceptable, doors could open and close well.

Refer the left picture.

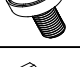

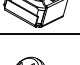

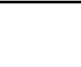

Step 6:

Install front door, rear door.
Put the door block to the hole of the bottom of frame, and set the front door/rear door. Fix the top of front/rear door by bolts and top of frame.

Refer the left picture.

7	1	REAR DOOR	H7	16		M6*12 Tapping Screw
8	1	FRONT DOOR	H8	4		Side Panel Limit Stop

RS Series Network Rack Assembly Instrucion

Step 1:

Use M8*12 round head inner hex screws & M8 flange nuts to connect the frames, top & bottom.

Note A: Ensure that the frame with earthing kits is at the right side, earthing kits is at bottom when assemble.

NoteB: Ensure that the fan-unit at top & cable entry at bottom is close to the rear side.

Refer the left picture.

Step 2:

Use M4*8 self-tapping screw to fix the fan unit to the top tray and side panel limit stops to the four posts of the two frames.

Refer the left picture.

Step 3:

Install the horizontal supports to the vertical supports with M6x12 Screws first. Then Install the vertical supports to the horizontal supports.

Note: The distance between the front and rear vertical supports can be adjusted according to your equipment installation depth.

Refer the left picture.
