

Aten RS47U100 47U RS Series Standing Network Rack (2277mm x 600mm x 1000mm)

47U RS Series Standing Network Rack (2277mm x 600mm x 1000mm)

ATEN Racks are designed for mounting standard 19" rackmount equipment – servers, routers, UPS systems, switches, audio/video devices – regardless of brand. All racks provide straightforward equipment organization, excellent security and simple cable management while enabling optimum airflow. To simplify deployment, ATEN Racks comes with casters and leveling feet. The casters allow ATEN Racks to be easily maneuvered into the desired location, where it can then be secured in place by adjusting the leveling feet. The RS Series Rack contains a locking, reversible, removable front door that is perforated to promote efficient airflow, as well as locking, removable solid side panels. Locking doors and side panels prevent unauthorized access to installed equipment. The RS Series Rack provides standard features for a more cost-effective rack solution.

Features:

High Ventilation Hexagonal Perforation

- Hexagonal perforated front and back doors provide higher tensile strength than round holes while ensuring efficient airflow and optimized ventilation

More Space for Cable Management

- Vertical cable management rail design in 800mm wide rack provides more space for network cable management

High Loading Capacity

- Static loading capacity up to 800KG
