

WyreStorm EX-70-G2 4K UHD HDBaseT Extender (Transmitter/Receiver) Set with HDCP/PoH/CEC Pass-Through

With unbeatable value and reliability for residential applications foremost in mind, the EX-70-G2 extender features HDBaseT™ Class B technology, extending 4K UHD video, audio and control up to 35m/115ft.

Features:

- 2K extender set capable of transmitting AV content over medium distances using a single category cable
- HDBaseT™ Class B transmission supporting 1080p @60Hz 36bit up to 70m/230ft
- Extends 1080p HDMI signal to 70m/230ft over Cat5e
- 2ch PCM and multichannel audio supported up to DTS:X and Dolby Atmos
- 2-Way PoH TX or RX to be remotely powered from either end for flexible installation options that reduce potential points of failure from a system
- Bidirectional IR pass-through
- Auto EQ and Auto EDID Management
- Supports CEC communication between devices
- 4K UHD transmissions up to 4096x2160p 60Hz 4:2:0 8bit also supported up to 35m/115ft (Cat6) or 70m/230ft (Cat6a/7)
- Low profile 15mm chassis allows quicker, easier installation behind flushmounted screens
- Threaded bushings allow use of both standard and locking DC power plugs
- Visual LED indication for power supply to units, signal status to show established display connection, HDCP presence in signal and HDBaseT™ link between devices
- Cable termination follows IEEE-568B standards
- Energy efficient universal power supply included
