

WyreStorm NHD-230-TX NetworkHD Standard H.264 AV over IP Encoder

The NetworkHD™ Standard H.264 AV over IP Encoder is a standard H.264 encoder for streaming HDMI sources to PC's, IPTVs, set-top boxes, tablets and smartphones or any device with video decoding capabilities. It supports SD and HD resolutions and HDMI stereo audio with separate A/V encoder settings and various streaming protocols for a wide variety of applications. With support for up to 10 unicast streams or highly scalable multicast streams

Features:

- Standard H.264 encoder for streaming to PCs, IPTVs, set-top boxes, tablets and smartphones
- Supports all input video resolutions up to 1920x1080
- Stereo LPCM or AAC audio encoding
- UDP, RTP, Unicast and Multicast streaming support
- Supports up to 10 simultaneous unicast RSTP sessions and highly scalable multicast sessions (requires a managed network)
- Separate video and audio encoder bitrate control
- Simple Web based configuration
- PoE powered
- Web-based software upgrade
