

PTZOptics PT-PRODUCERPLUS-30X Producer Plus 30X Live Streaming Kit (4 Camera Maximum)

The Producer Plus kits are for use with up to 4 HD broadcast cameras. The kits are designed around a Thunderbolt 3 external PCIe slot and includes a Magewell Quad SDI input card. This allows you to use up to 4 cameras reliably without impacting the performance of your PC. The kit includes a powerful Intel NUC Skull Canyon and a single PTZOptics 30X SDI G2. The Producer plus includes everything you'll need for a complete system for recording and live streaming.

Live Production

You can use the Producer Plus kit with your favorite video/audio mixing program such as vMix, Wirecast, OBS, xSplit and many more. Using these software gives you the ability to make a custom experiences for your viewers exactly how you want it. Use lower thirds, overlays, virtual sets, and many of the other features built into these software to share your content exactly as needed.
