

Adder RD1916IPUS Rack Tray with 19in Samsung screen plus AVX1016IP KVM switch

The ADDERView RDX 1000IP provides local and remote management for your server room with an integrated AVX1016IP KVM Switch. This product features a 19 inch premium quality Samsung SXGA 1280 x1024 TFT LCD panel with touchpad control and advanced OSD for device selection. This unit controls 16 computers via a secure IP connection and can expand support up to 256 computers by adding CATx 1000 switches. The 1U keyboard tray is available in most language layouts as well. In addition, the switch may be connected, via CATx cable, to any type of server including PC, Mac and Sun using ADDER's CAM modules. The ADDERView RDX 1000IP provides country code reporting, DDC and continuous keyboard and mouse emulation to further ensure faultless operation across your unique installation. With LDAP integration plus ADDER.Net management software this product allows you to automate the task of managing your network hardware and authenticating users against your existing LDAP infrastructure. The integrated RS232 gives the ability to control other external devices such as power management devices. The enterprise grade integrated KVM over IP switch employs AES128 bit encryption and RSA2048 authentication ensuring your control system remains secure at all times. Available with the following connectivity options: Serial (AVX5000 only), USB, PS/2, VGA & 3.5mm Audio
