

Electro-Voice FMCK Front Mount TNC Connector Kit

The FMCK includes four front-mount antenna cables with female TNC connectors on one end and a bulkhead male TNC on the other end. The male connectors mount in the provided knockouts of the RM-S and RM-D rack mount kits. The four included cables are enough for two receivers.

Features:

- Female TNC end connects to any EV/Telex receiver
- Male TNC connector mounts in the rack mount knockouts
- Four cables included in each kit, enough for two receivers
