

PureLink SC-DS1 DVI/HDMI to 3G-SDI Converter

PureLink's breakthrough 3G SC-DS 1 converts any DVI/HDMI signal to HD-SDI. The new interface consists of a single 3 Gb serial link, and is standardized in SMPTE 424M for up to Dual Link HD-SDI. The new SC-DS 1 can now support up to 1080p native resolution, and is compatible with PureLink's HDG-8000 Pro Hand-held Test Pattern Generator. Field tests by several broad stations in Southeast Asia over the past year have confirmed the SC-DS 1's reliability and compatibility with existing platforms. (Not HDCP Compliant)
