

Electro-Voice RE2510CG RE2 Series Wireless Condenser Supercardioid RE510 Handheld System G-Band (614-642 MHz)

RE2 Series Wireless Condenser Supercardioid Handheld System G-Band (614-642 MHz, RE510 element)

System includes: Receiver + RE510 Handheld Transmitter

RE510 Handheld Transmitter

Features

- RE510 Condenser
- Internal 1/2 wave antenna

Benefits:

- Fits the vocalist's style and environment
- Classic dynamic sound and performance in applications ranging from rock and roll to spoken word
- Low handling noise, crisp condenser sound and off mic performance. Perfect for schools, houses of worship and any other multitasking application.
- Excellent sound and gain-before-feedback for high SPL stages
- Excellent range; stays out of harm's way

Receiver

Features

- Unique "smart" battery
- LCD Displays Group and Channel, Frequency, or Battery Level
- Low battery LED
- One On/Off button that also acts as a mute
- On/Off button can be disabled
- Cell phone style beltclip
- Optional pouches available
- A wide selection of lapel and headworn microphone accessories are available

Benefits:

- Impossible to put the battery in wrong, great for quick changes on a dark stage
- All the info you need at a glance
- Tells you when to change the battery
- Great for pauses in presentations and worship services
- Prevents accidental turnoffs during a performance
- Offers quick and easy attachment
- For use under costumes or for more vigorous applications like aerobics
- So you can select the microphone suited to your application
