

TV One 1T-VGA-414 1x4 RGB/YPbPr VGA Distribution Amplifier

DESCRIPTION

1T-VGA-414 RGBHV Distribution Amplifier provide 4 outputs respectively for use in any situation requiring multiple outputs from a single PC or other RGB video source. Their video bandwidth in excess of 500MHz handles computer resolutions up to 2560x1600 at distances up to 300 feet from the source without signal deterioration. Both models provide VESA industry standard DDC (Data Display Channel) bidirectional communications for host control of the downstream monitors. Input and Output connectors are high quality HD-15 type. Both products are FCC & CE approved and are RoHS compliant. The power supplies are UL, CE, CSA approved and RoHS compliant.

Both models are housed in small rugged metal cases. They are 5VDC powered and a Power Adapter is included. Optional rackmount kits are available to house either one or two units

FEATURES

- Drives Monitors up to 300 feet away
- 500+MHz Signal Bandwidth
- Max Resolution 2560x1600
- Locking DC Power Connector for Security
- Units can be cascaded for even greater flexibility
