

Galaxy Audio AS-1106 1100 Series Wireless Personal Monitor with EB6

This listing is for AS-1106 Wireless Personal Monitor (Earbuds EB6) only. Use description below as a general reference.

Wireless Personal Monitors are effective at eliminating stage noise, protecting users' ears from damage, allowing the user to move around the stage or audience and continue to hear, and eliminate feedback.

The **AS-1100** is easy to use. The Any Spot WPM replaces floor wedges and the amplifiers that power them. Simply plug the ANY SPOT into a 'monitor out' jack on the mixing console, create the desired mix, and it's ready to deliver quality sound. The AS-1100 has 120 selectable UHF frequencies to help locate the best and clearest signal to transmit. The transmitter (AS-1100T) is selectable to either mono or stereo.

The **AS-1100R (receiver)** features a 100mw headphone amplifier with a standard 3.5mm (1/8") headphone output. The AS-1100R is sure to be plenty loud for any environment. The receiver has a built in limiter & LCD display.

The **AS-1100T (transmitter)** has two XLR/1/4" combo jacks for its inputs, stereo/mono switch, headphone output, volume control, & LCD display. The transmitter includes a single/dual rack mount kit, for mounting 1 unit in one rack space or mounting two transmitters side by side in one rack space.

The AS-1100 can be purchased with either of our Earbud upgrades the EB6 (AS-1106) or the EB10 (AS-1110).

The Any Spot Series of Wireless Personal Monitors is a great alternative for performers who are tired of lugging around heavy and bulky floor monitors and tired of leaving a gig with ringing ears. The AS-1100 allows the user to move freely around the stage or audience and continue to hear the monitor mix.

Features:

- 120 Selectable Frequencies
- 300' Range
