

Galaxy Audio AS-1106-4 1100 Series Wireless Personal Monitor Band Pack with EB6

This listing is for AS-1106-4 WPM Band Pack only. Use description below as a general reference.

The AS-1100 packs an amazing punch. The transmitter has stereo XLR/¼" inputs, headphone output, and LCD display which displays the channel and input level. The Receiver has an LCD with channel, battery level, and RF/AF indicator. The AS-1100 is perfect for anyone looking for their first system or to upgrade to the next level.

An unlimited number of receivers may be added at any time.

Features:

- 120 Selectable Channels
- UHF Frequencies
- Backlit LCD (Displays Channel Number and Freq.)
- Stereo or Mono Transmission
- Single Rack Mount Included
- 300' Range

The **1100 Band Pack Systems** makes it easy for any band to Get Personal. The system includes four receivers and one transmitter. It is designed to get the whole band wireless in one package. The AS-1100-4 will allow a band to send one stereo mix to 4 individuals. Additional transmitters may be purchased at a later date to add mixes.
