

# SureCall Fusion7 Voice/Text/4G LTE Cellular/Wi-Fi and HDTV Signal Booster

Designed for commercial buildings and large residences, the Fusion7 is the first ever all-in-one signal booster that increases Cellular & Wi-Fi signals up to 20,000 sq ft and boosts HDTV signals for up to 25 TVs.

- Fusion7 kits include 4 internal antennas, providing the flexibility to customize your installation to meet the needs of any large building or challenging floor plan.

- The Fusion7 is configurable for all indoor environments and includes SureCall's patented booster technology that increases voice, text and 4G LTE signals for all cellular carriers in North America, including Verizon, AT&T, Sprint and T-Mobile. Increases cellular signal for up to 20 simultaneous users, covering up to 20,000 sq ft

- Fusion7 includes a built-in Wi-Fi signal booster and router that extends network coverage for areas up to 20,000 sq ft. Wi-Fi signals are broadcast throughout the building via the included indoor antennas, eliminating the need for additional Wi-Fi network extenders.

- Optional HDTV boosting accessories bring locally aired HDTV television stations into the building for up to 25 TVs. Along with built-in Wi-Fi, the Fusion7 provides greatly enhanced streaming video through Netflix® and other on-demand streaming media providers.
