

Blonder Tongue AMCM-860DS Modular Agile Audio/Video Modulator (HE Series)

AMCM-860 is a frequency-agile stereo analog audio/video modulator available in NTSC channels 2-135 (54-860 MHz). Models are available in both stereo and mono audio inputs. This 4th generation of AMCM-860 is equipped with the CALMTones feature, utilizing Audio AGC

FEATURES AND BENEFITS

- Audio AGC feature prohibits commercials that accompany broadcast programs from:
 - (i) having modulation levels substantially higher than the broadcast program; and
 - (ii) having an average maximum loudness substantially higher than that of the broadcast program
- Audio AGC feature prohibits commercials that accompany broadcast programs from:
 - (i) having modulation levels substantially higher than the broadcast program; and
 - (ii) having an average maximum loudness substantially higher than that of the broadcast program.
- Audio AGC feature provides consistent audio level among all broadcast programs on different channels and among different programs within the same channel
- Compact design allows for deployment of 12 channels in 2RU
- Utilizes SAW filters for improved performance
- Die-cast chassis for RFI immunity
