

Shinybow SB-6340T CAT5 COMPONENT VIDEO Extender (TRANSMITTER)

This listing is for SB-6340T Transmitter only. Use description below as a general reference.

CAT5 Component Video Splitter Extender extends video signals up to 300 meters (1000ft) using inexpensive CAT5 / CAT6 UTP cable. This video splitter extender consists of two units. The Transmitter unit connects to your local component video source and allows you to extend to multiple remote monitors. Cat5 component video Splitter extender via Cat5 is the ideal solution for applications to display the same image on multiple remote locations. These AV splitter extenders are commonly used at restaurants, bars, clubs and other HDTV environments for video broadcasting such as remote monitoring, presentations and advertising. Please note Component Video Remote Receivers are not included and must be purchased separately along with the Splitter/ Extender for correct functionality.
