

## Atlona AT14039-6 20FT ATLONA HDMI (1.4) CABLE (CL3) WITH ETHERNET

Atlona High Speed HDMI cables with Ethernet are designed to provide the highest quality in High Definition Video and Digital Audio transfer. Simply the best cables you can get.

The Atlona High Speed HDMI cables with Ethernet are unlike any cable you will find on the market. Supporting transfer rates beyond 10.2 Gbps at resolutions **4 times higher than standard 1080p (up to 4096 x 2160)**, this cable is designed to surpass all current standards of HDMI. Experience stunning colors, Dolby TrueHD & DTS-HD Master Audio and 100 Mb/sec Ethernet through our premium cables and you'll understand just how much you've been missing. In the world of HD cables, no one can compete with Atlona quality. These cables have been certified for the latest HDMI specification, and cables above 15 feet are UL CL3 rated for in wall use and RoHS.

### Applications:

Primarily used to connect BluRay & DVD players, HD satellite & cable boxes, LCDs, projectors, Plasma displays, HDTV's and much more. The New features of 3D and Ethernet enabled HDMI cables allows for information pass thru of optimized features of new BluRay players and LED/LCD HDTV's.

### Features:

- **HDMI High Speed Cable with Ethernet**
- Atlona HDMI Cables are able to support extremely high resolutions much beyond standard 1080p or 1440p. **Future proof for resolutions up to 4K or 4096x2160**
- Supports Video Bandwidth above latest HDMI Standards 387MHz (far beyond 10.2 Gbps)
- Ethernet Data Channel allows devices to share a high speed network connection and internet connectivity without a separate ethernet cable
- Designed to support TV's with high refresh rates (up to 800MHz)
- Due to high bandwidth video support, this cable is fully able to transfer 3D content. **Experience true 3D movies from newer 3D enabled BluRay players**
- Audio Return Channel will allow the user to eliminate excess cables which are connecting the TV and audio receiver to single a HDMI cable
- Supports all digital audio formats including Dolby TrueHD and DTS-HD Master Audio
- Round cable design with slick cable jacket and our CL3 rating makes it a breeze to pull through the wall in new construction or retrofit applications

### Specs:

- 6M (20 ft.) round HDMI Cable construction
- Dual-link bandwidth: **387 MHz (over 10.2 Gbps)**
- Separate **Ethernet Data Channel which will allow high speed send/receive (up to 100 Mb/sec)**
- Audio Return Channel
- Fully 3D compatible for future use
- Supports 2K (2048x1556) and 4K (4096x2160) resolutions
- 24k Gold plated connectors ensures no signal loss
- High-Purity Oxygen Free Copper conductors
- High-Density triple shielding for maximum rejection of EMI and RFI
- Ultra Flexible
- RoHS Rated
- HDCP Pass-through
- UL CL3 certified - to be used for in-wall applications (for cables longer than 15 ft. only)
- Black color.

### Warranty:

Lifetime parts and labor warranty

### Why Atlona cables and not someone else's?

Since the company was created (more than 8 years ago), we have been committed to providing our customers with quality products. Our HDMI cables are built to exceed HDMI specifications for bandwidth, frame rate support and more. There are not very many companies that manufacture their cables to even meet the HDMI standards. The founders of HDMI require adopters to manufacture their cables in an HDMI certified factory in order to fully meet HDMI certification specifications. Making cables at a certified facility adds the benefit of using industrial quality pre-inspected materials in the manufacturing process. Our cables also meet UL CL3 rating for in-wall installations directly from the production line; since the outer jacket of the cable complies with all UL requirements for the CL3 standard. Every Atlona cable is also RoHS certified, which means, that they contain no lead or other materials that could potentially harm your pets and children. Large companies that have established themselves in the "high end" market may manufacture their cables under these standards, but their prices are extremely high. This usually happens for either one or both of main reasons:

- 1) The marketing department thinks that their company is so well recognized, that consumers will buy their products regardless of the price.
- 2) The products of these companies go through so many dealers or "middlemen," that in order to pay them they have no other choice, but to raise prices.
