

Gefen CAB-DVIFO-210MM DVIFO DVI-D Fiber Optic Cable 210 ft (M-M)

DVI Fiber Optic Only Cables

DVI Fiber Optic - Fiber Optic Based DVI Cables: These Fiber Optic-based cables exceed the performance of copper- and silver-based cables. They are an integrated DVI-D cable solution which includes the fiber optics and electro-optical components built into the cable and its DVI connectors. This flavor is called DVI Fiber Optic (DVI FO) cable and it requires a clearance of 1-1/2"; wide conduit. **These cables are HDCP compliant.**

The lengths available are 33-1640* feet.

*For cables over 330 ft., please call us for pricing and availability.

*These cables come with a single power supply which is installed at the display end. A second power supply may be necessary at the source end of the cable if the video source does not put out sufficient power.

HDTV Resolutions Supported: DVI Fiber Optic Cables support resolutions up to 1080p.

Computer Resolutions Supported: DVI Fiber Optic Cables support resolutions up to 1920x1200.

Note: DVI Fiber Optic Cables are not designed for permanent in-wall installation. Please use the Gefen DVI 1500HD Extender for permanent in-wall installation.
