

Gefen EXT-HDMISB-50 HDMI Super Booster Cable 50ft.

HDMI Super Booster Cables

HDMI Super Booster Cables: The HDMI Super Booster Cables are a copper cable based solution with an integrated HDMI Super Booster, available in the lengths of 50, 75, 100, 125 and 150 feet.

HDMI Super Booster cables offer the highest resolutions possible up to 1080p. HDMI digital audio is also supported by this cable and allows for the highest possible quality A/V experience with zero signal loss.

This plug and play installation takes mere seconds. Simply connect the locking male HDMI connector to your HDMI source. Connect the other side of the cable having the flat metal HDMI Super Booster to the HDTV.

HDMI Super Booster Cables in lengths of up to 100 feet support these HDMI 1.3 Features:

- Lip Sync Pass Through
- 225 MHz (up to 12 bit YUV 444 @ 1080p)
- Deep Color Supported (XV Color)
- Dolby TrueHD & DTS Master Audio
- CEC Source Switching Enabled

The 125 and 150 foot cables will support HDMI 1.2 at 1080p.

HDTV Resolutions Supported: 480i, 480p, 720p, 1080i, 1080p. Only cables up to 100 ft will support HDMI 1.3 at 1080p.

Computer Resolutions Supported: These cables will support a maximum resolution of up to 1920x1200 @ 60 Hz.

A Note on Power:

Occasionally a video source will not be sufficiently strong to power the EXT-HDMISB cable. A universal power supply (Gefen Model No. EXT-PS51AIP) is included with each cable to prevent this from happening.
