

Atlona AT-PCLink AT-PCLINK Wireless DVI with Stereo Audio and Dual USB - KVM Extender

The Atlona AT-PCLINK is a wireless system designed to give a user access to their PC with a secondary keyboard, mouse, display, and PC speakers through wireless transmission. The PCLINK can connect to any desktop or laptop computer using the USB dongles, transforming it into a sleek simple access point that can be used up to 30 feet away from the base station. If the application requires addition stations you can connect up to four receivers to one transmitter. The PCLINK is capable of the following resolutions 1400x1050, 1280x1024, 1024x768, and 800x600.
