One HDMI Input, Eight HDMI Outputs -- In a Slim and Small Form Factor

The GefenToolBox 1:8 Splitter for HDMI is a compact and lightweight alternative to rack-mounted HDMI splitters. It allows set-top boxes, DVD players, and other HDTV devices to be connected to eight HDTV displays. If more displays are needed, the device can be daisy chained to support more than 8 displays with a single source. Features include support for high definition Deep Color resolutions up to 1080p@60 Hz combined with advanced lossless digital audio formats for pristine sound reproduction.

How It Works
