

## **Atlona AT18008-2 6FT SVGA Male/Male cable**

### **6FT Atlona SVGA Male/Male cable. Model: AT18008-2**

A perfect cable for either connecting a computer to the computer monitor or for connecting a computer to HDTV or projector. 24AWG impedance-matched conductors ensure high-speed, error-free transmission. Each conductor is stranded and made out of oxygen-free copper for perfect signal transfer. High-Density Double shielding isolates the cable from EM and RF interference, which are the two key factors in signal noise and degradation. Dual Insulation will aid a great signal transfer, reduced noises plus increase a cable durability and cable life.

### **Applications:**

Interconnecting a computer, computer monitor, HDTV, Cable, SAT receivers or any other equipment that supports 15-pin connection. Connection can also be called: SVGA, S-VGA, HD-15, DB-15

### **Specs:**

- 24AWG OFC conductors
- High-Density double shielding consists of 100% copper/mylar foil and 89% copper braid for greater rejection of EMI and RFI
- Double insulation for great signal transfer and dramatically reduced dielectric losses.
- 24k Gold plated connectors
- Supported 4:3 resolutions: 320X240; 640X480; 800X600; 1024X768; 1280x1024, 1280X1024; 1600X1200;
- Supported 16:9 resolutions: 480p; 720p; 1080i; 1080p; 854X480; 1366X768; 1600x1050, 1400x900, 1820X1024; 1920X1080, 1920x1200
