

Atlona AT11010-3 10ft High-Performance USB 2.0 Extension Cable A to A (Male/Female) Cable

Atlona 10ft High-Performance USB 2.0 Extension Cable A to A (Male/Female) Cable. Model: AT11010-3

The Atlona 10&39; High-Performance USB 2.0 Extension Cable A/A (Male/Female). This is a fully molded cable can support transfer rates up to 480 Mbps. Cable provides High Speed link required for peripherals such as Printers, Fax Machines, Copy Machines, Scanners, Keyboards, mouse&39;s, and everything else that has a USB interface to communicate with a PC or Mac. The cable is featured with gold-plated connectors to provide maximum signal transfer without any errors. With the use of Oxygen Free Copper conductors, this cable can transfer full speed USB 2.0 without any degradation and therefore user will never have any issues with printer not receiving correct data or crashing a printer.

Features:

- A-male to A-female connectors
- 24K gold-plated connectors and Oxygen Free Copper Conductors to ensure the full signal transfer without errors
- 20 gauge wire used to make sure that high bandwidth of USB can be transferred as far as 15ft
- Plug-and-Play
- Error Free transmission will confuse printers or crash them. Remember any errors will require user reboot printer or cancel printer job. Atlona had made sure that their customers don&39;t go through that trouble.
- Double Shielding
- Designed for either Printers, Copy Machines, Fax Machines, Keyboards, Scanners, etc...
- Compatible with PC and Mac
