

## **Atlona ATP-18007-5 15ft Plenum VGA (HD15) Male/Female Extension Cable (up to QXGA 2048x1536)**

The All New Atlona Plenum VGA ( HD15 ) cables are a must have for any system integrator or installer performing an installation in any School, University, Hospital, Government or other commercial building. The plenum space above dropped ceilings and under raised floors is the optimal place for routing communication and A/V cables. VGA ( HD15 ) Cables are used for connecting Video Projectors, LCD Displays, Plasma Displays and Computer Monitors.

### ***Atlona Plenum VGA ( HD15 ) cables are the only of its kind which can support:***

- 2K resolutions (2048x1536)
- All connections are wired (while most cables you will find from other suppliers only have 9 wires connected which means that some DDC and Sync functions would not work)
- USA and Canada UL flame certification (CMP which covers both CL2P and CL3P)

Our Plenum VGA High Resolution Cables are built to last and perform to the highest expectations. The cables are featured with oxygen free pure copper conductors, triple shielding to reject EMI and RFI, and gold plated connectors. CMP certified jacket and Teflon inner insulators provide the fire protection to run these cables in the walls or Air Plenums without a conduit. All of our Plenum VGA Cables are compatible to the latest VESA standard and will pass all resolutions up to PC: 2048x1536 HDTV: 1080p

### **Specifications:**

- 15 ft Plenum VGA ( HD15 ) Cable
- Type: HD15
- Configuration: 15 pin
- UL Listed, CMP certified cable jacket
- Low Smoke PVC outer jacket and FEP, Teflon inner insulator
- Supported PC Resolutions: 640x480; 800x600, 1024x768, 1280x800; 1280x768; 1280x1024; 1366x768; 1440x1050; 1600x1200; 1920x1200; 2048x1080 and 2048x1536
- Supported HDTV resolutions: 480p, 576p, 720p, 1080i, 1080p
- 24k Gold plated connectors
- High-Density triple shielding for maximum rejection of EMI and RFI
- ROHS Rated
