

Atlona AT-HD590 PAL to NTSC HDTV Video Converter with a Built-In Tuner

Atlona PAL to NTSC HDTV Video Converter with a Built-In Tuner Model: AT-HD590

The Atlona AT-HD590 is a High Definition PAL to NTSC Converter and Scaler. The AT-HD590 features 2 HDMI inputs, 1 x AV input and 1 x PAL TV Tuner, allowing any input to be scaled and converted to NTSC output at resolutions, up to 1080p. A true "world ready" product, the AT-HD590 includes an external power supply, with all international plug types, allowing it to be used in any country in the world, without the need to purchase a costly power conversion adapter.

Application:

As world is getting smaller, we have more and more consumers are traveling back and forth between countries. All geographies outside North America (USA, Canada & Mexico) and Japan use PAL or SECAM video formats and 50Hz for HDTV video playback. The AT-HD590 is a perfect solution for those who want to take a TV from USA/Canada/Mexico/Japan to any other country in the world.
