

Gefen EXT-RMT-SR-IR Remote Control for Gefen Scalers up to 30ft

Control your Gefen Scaler comfortably from up to 30 feet away.

The Gefen RMT-SR-IR IR Remote Control allows effortless A/V source switching and adjustment of operational settings on your Gefen scaler from your easy chair. It allows complete control from a distance of up to 30 feet away.

How It Works

Simply point the RMT-SR-IR at your Gefen scaler unit. Press the buttons corresponding to the desired operation. The scaler will carry out the desired action. An LED indicator light confirms each keypress to show that IR commands are being sent to the Gefen unit.

Note: The RMT-SR-IR IR Remote Control and the Gefen unit to be controlled must be in a direct line of sight without objects between them in order to function properly and achieve the 30-foot maximum distance range of operation.

Compatible With the following models: EXT-VGA-2-DVISP , EXT-VGAAUD-2-HDMIS , EXT-HOMETS , EXT-HOMETSP , EXT-HDMATE-S and others.

Features:

- Compact, small and light unit fits in a pocket
- Controls your Gefen unit from up to 30 feet away (when used in line-of-sight orientation)
