

Cabletronix CTHC-12G RF Passive Combiner/12 Port/Rack Mount 1.75in H

The CTHC-12G is a professional quality 12-port passive output combiner designed for commercial grade, private cable networks employing multiple modulators and processing equipment. Quality design engineering and manufacturing are reflected in the CTHC-12G's port-to-port isolation figures as well as the unit's insertion loss specifications. Input and output return loss figures contribute to the CTHC-12G's highly competitive specs.

The CTHC-12G is 19" rack mountable, and withstand environmental temperatures up to 122° F.

Support for 12 devices, compelling performance specifications, and installation flexibility makes the CTHC-12G an outstanding value.

Features

- Supports up to 12 modulators and/or processors
- Broad frequency range of 40 - 1000 MHz supporting virtually all cable network services
- Excellent port-to-port signal isolation, insertion loss, and input/output return loss figures to ensure excellent signal reproduction
- -20 dB test port
- Excellent value
- 1 year warranty
- 3 year extended warranty available
