

PureLink MPX-100 PureStream HD Network Digital Signage Player

The **PureStream MPX100** a full-featured, high-definition media player that manages and distributes brilliant digital signage to each display using video over IP technology and advanced decoding capabilities with support for a wide range of media formats. Export playlist content via the built-in WiFi, LAN, or USB options for a self-sufficient, non PC-based media playback solution. The MPX100 offers 4 GB of built-in flash memory, as well as a securable SD card slot allowing expansion of up to 128GB for local content storage. The unique fan-less design eliminates noise and protects against debris, providing low-power operation and maximum reliability.

Together with the **MPX MediaSmart Management Software** application, a simple and intuitive web-based interface for playlist scheduling and dynamic content creation, the **MPX-100** offers an effective and easy way to manage, monitor, and design digital signage messaging.
